

Functions :

23 July 2025 19:01

A function is a block of code that performs a specific task , and that Can be called whenever needed.

A function is also used to avoid repetition in the code...i.e., if a statement or a logic is used several times it is put in function to avoid repetition in the code.

>Function declaration :
Function functionName(){
 conditions , expressions....
}

>Function calling :
functionName();

>Arrow Functions :

1. `const print=() =>{
 console.log("hello");
};
print();
Output : hello`

2.`const sum=(a,b) =>{
 console.log(a+b);
};
print(3,4);
Ouput: 6`
